

**To note danger,
the earlier,
the better!**

Are risks noticed?
FARSEE Purifier says
“Yes!”

Real-time detecting and
alarming harmful gas
to be your safe guarder.

with ingenious design

with innovative functions

with super materials

All to Deliver The Best

hand wave control 

 smart alarm

plasma to kill germs 

 ion to remove dust

PM2.5 monitor 

 data display

top-level configuration 

 one for dual use

hand control 

 excellent touch feeling

excellent purification, comfortable environment

dust or smoke

volatilized odor

generated mold

Hidden risks are everywhere.

high concentration ions
15million pcs/cm³
to create an oxygen bar

99%
PM2.5 Cleared

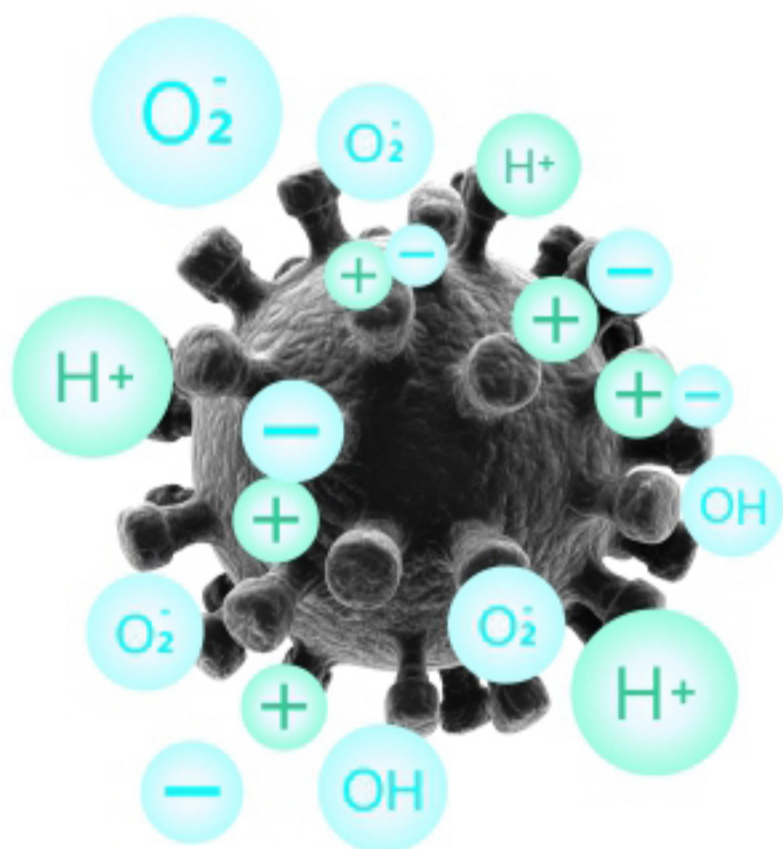

Operating principle of ion purifier

The unstable negative ions can actively attracted the polluted micro-articles in the air which are always positively charged, thus to make the invisible PM2.5 form into clusters and all fall down.

The negative ions can weak or kill the bacterial protein to make the air purified and deodorized.

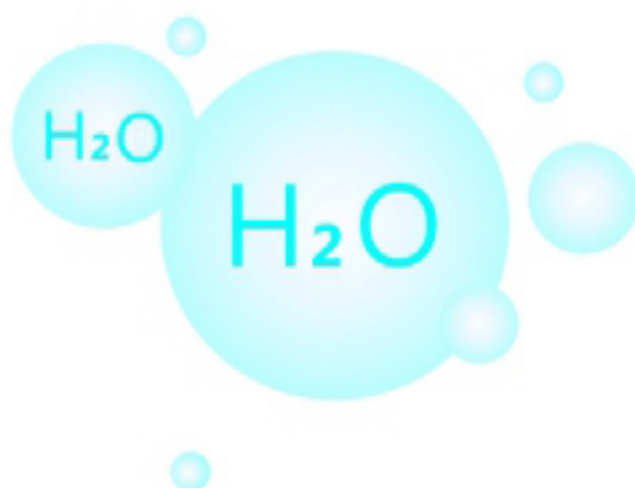

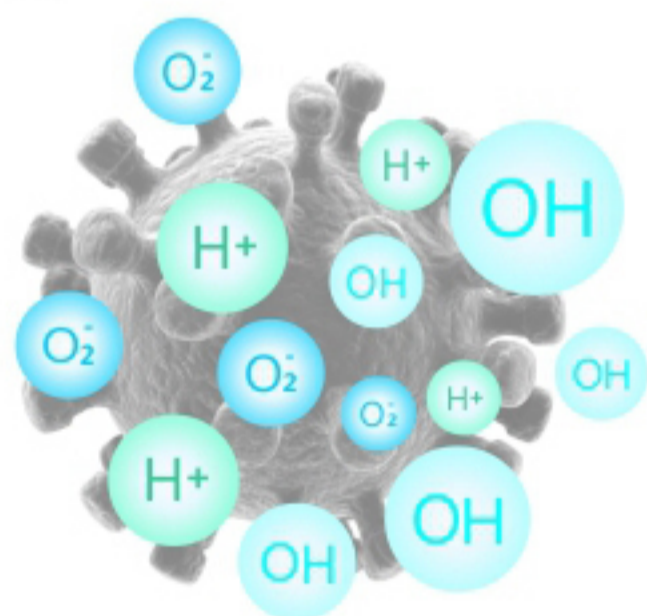

Plasma custers can catch germs and bacteria actively to achieve the deep purification.

The positive or negative ions are generated and released, to inhibit, destroy and remove the floating viruses actively, to achieve a much more thorough purification than the normal filters.

98%
Viruses Cleared

The ions are released by FARSEE purifier, to adsorb the virus or fungi and generate hydroxyl radical, thus to extract H and break down the bacterial proteins.

The combination of hydroxyl radical and H will form into H_2O .

Germes are killed and the air is purified.

Real-time monitor & data display

AIR QUALITY - Seeing Is Believing

Intelligence = Purifier + Detector + Alarm

Visible Air Quality

with the top-class sensor

with data display

to show temperature, humidity & PM2.5

temperature & humidity
sensor from Switzerland

PM2.5
sensor from Sharp Japan

PM2.5

Real time protection

Real time alarm

When there is a danger,
the fastest response can keep
us out of the risk.

FARSEE purifier makes the invisible
danger visible to care our health
and protect the surrounding always.

Top-class sensors are highly sensitive at formaldehyde, benzene, carbon monoxide,
ammonia, chlorine, alcohol, cigarette smoke, TVOC, etc.

To place and purify wherever you like
vehicle, desktop, bedroom, office, etc.

Portable base to fit the cup holder in vehicles

FARSEE purifier with portable base, can be used in car or on desk.
During work or entertainment, it assures you the fresh air all the time.

With the portable base,
FARSEE purifier can work well in the cup holder inside the vehicles.

Inductive Switch by Waving Hand

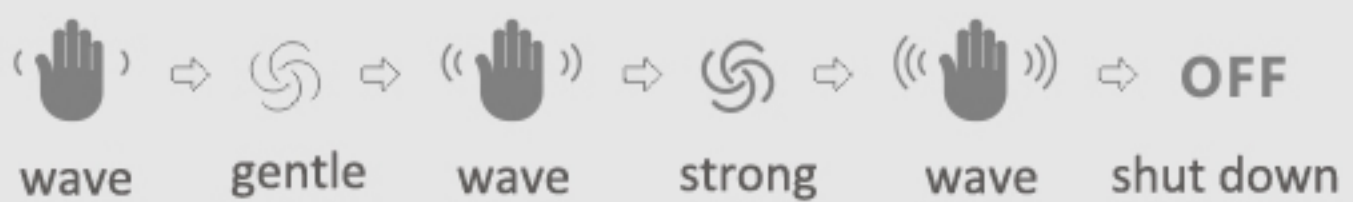

Smart and Safe

Revolutionized development on the control mode

no-button design, wave your hand to start, shift and stop

Easiest way to control

FARSEE
cares health
cares life

sensor switch by hand
easy control
focus on driving
