

4.0mm

New screw

(most used in the whole market)

3.7mm

Old screw

(seldom used by the smokers)

New type battery connector

Compatible with the most popular eGo components in the market

Connecting size is changed. Inside are the best battery core and PCB.

New screw

(Most used in the whole market)

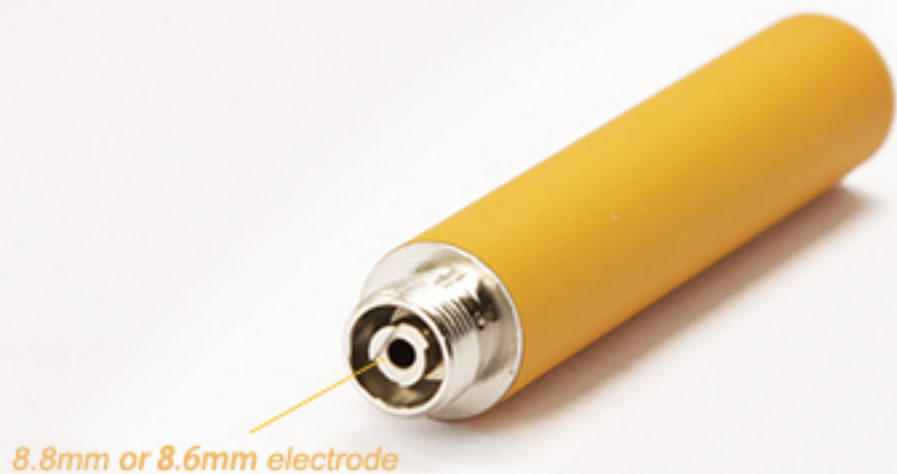

Old screw

(Seldom used by the smokers)

New FS510 battery screw adapts the most popular size for 510 series in the whole market.

Also it uses the best battery core and PCB inside to guarantee the highest quality and technology.

Old Type Cartomizer

(Works only on the old type 3.7/3.3mm screw of eGo or 510 battery)

New Type Cartomizer

(Works on both old or new type batteries. The new 4.0 mm screw batteries will be the best)

New FS eGo/510 cartomizer uses the new size electrode which can compatible with the most used eGo/510 screws in the market very well. We only changes the electrode length but all the other inside structures keep the same as before. So it has no influence to the function or quality on both the old and new batteries. All FS Tank Systems are compatible with both of the old and new batteries.
