FH501 INTRODUCTION

Product Name: Disposable Isolation Gown

Materials: SS + PE (65g)

Default Color: White

Usage: For common isolation in clinics, hospitals, laboratories, etc. to anti-dust, anti-bacteria, anti-virus, etc.

Common Size:

M (165cm)/L(175cm)/XL(185cm)

General Material Introduction:

The non-woven fabric is a kind of thermoplastic resin made from polypropylene. It has the advantages of non-toxic, odorless and great protective properties. Its density is only 0.9 ~ 0.91g/cm³, which is one of the lightest materials in the variety of the plastic industry. The isolation gown can provide a reliable and effective protection for people who are in the environment with dust, bacteria, germs or any other harmful substances.
